[2024-07-27 08:25:48 GMT, FreeToastHost System Warning] *** IMPORTANT! ***NOTE: The FreeToastHost server was unable to create / renew a HTTPS certificate for your custom domain:

sandbelttoastmasters.com.au

*** This means that you may not be able to access your website using https:// with your custom domain

name after any existing certificates expire.

Possible causes may include:

- a. Your custom domain's DNS records are set up incorrectly on your registrar's website.
- b. You are using domain forwarding--it is **not** supported.
- c. Your custom domain has expired. (If so, you must address this with your registrar.)
- d. The custom domain listed in the admin console is no longer being used.
- e. The FTH server was temporarily unable to connect with the free LetsEncrypt! service to create the certificate.

(If so, this could be resolved automatically in a week.)

*** Note that the system may remove your custom domain from the database to prevent further invalid attempts at cert renewals.

You may also access your website via <https://1634.toastmastersclubs.org>

You can check your custom domain's expiration date using:

<https://who.is/whois/sandbelttoastmasters.com.au>

You can view your current DNS records using:

<http://www.digwebinterface.com/?hostnames=sandbelttoastmasters.com.au&type=ANY&colorize=on&onlyfirst=on&userresolver=8.8.4.4&ns=auth&nameservers=>

You can try to troubleshoot your DNS records using:

<http://www.dnsstuff.com/tools#dnsReport|type=domain&&value=sandbelttoastmasters.com.au>

Please contact the FreeToastHost support team at <https://support.toastmastersclubs.org> for more details and assistance.
