

1. Here is the error I get when I change the domain name from www.slhardware.com to marmaladetm.com.

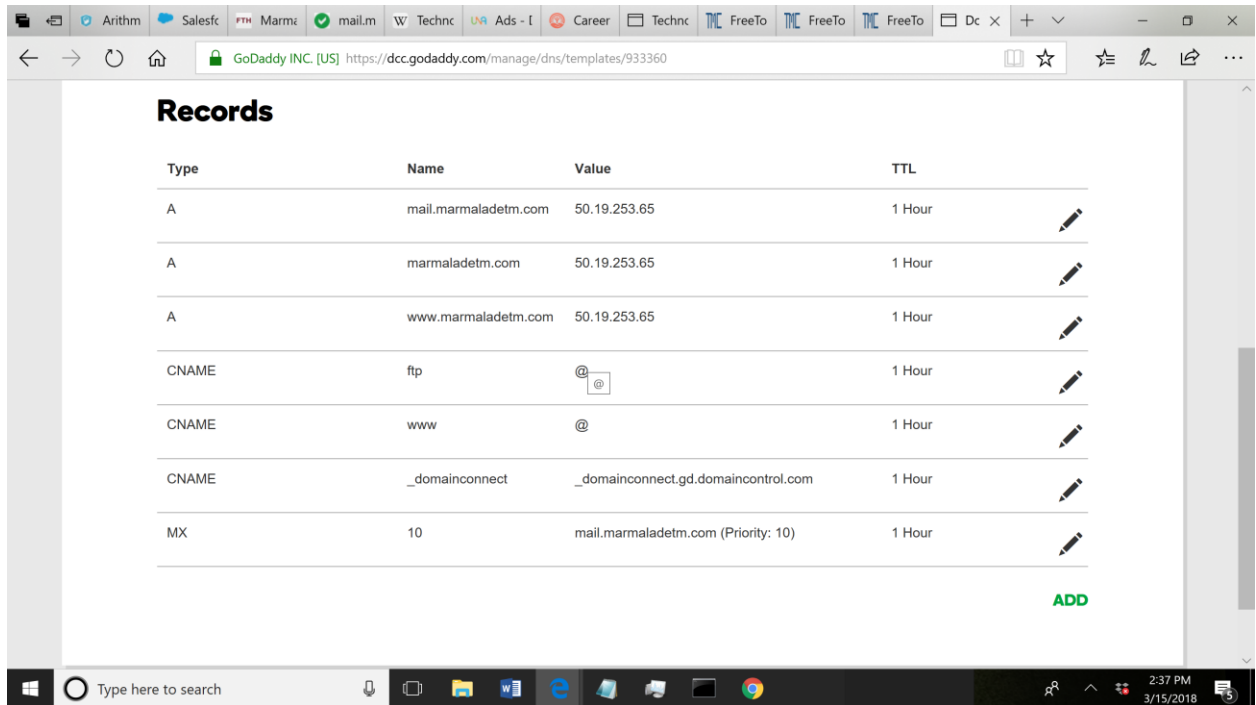

I've tried using Edge and Chrome browsers running on Windows 10. I tried clearing the browser cache and restarting the browser with Chrome and trying again, but got the same error every time.

I tried all of this a couple of months ago and again today and got the same error.

I tried filling in the website alias and also leaving it blank. Same error. I tried using marmaladetm.com and also www.marmaladetm.com for the domain name. Same error.

Does this change need to be made by a FreeToastHost admin? I'm wondering if the problem is that I'm logged into the website while I'm changing the domain name out from under myself.

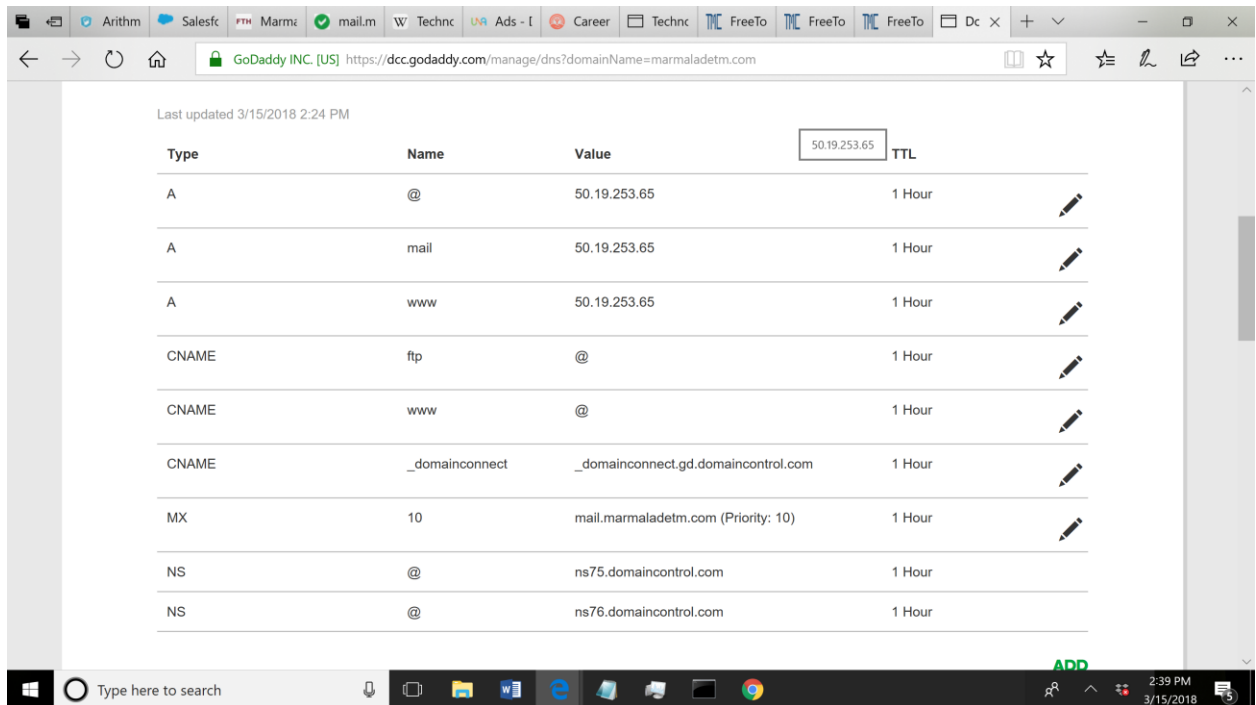

2. Here is the template I used to create DNS entries on GoDaddy.com

The screenshot shows a web browser window with the GoDaddy INC. [US] URL: <https://dcc.godaddy.com/manage/dns/templates/933360>. The page title is "Records". It displays a table of DNS records for a template. The table has four columns: Type, Name, Value, and TTL. There are seven rows of records. Each row has a pencil icon to its right. A green "ADD" button is at the bottom right of the table.

Type	Name	Value	TTL
A	mail.marmaladetm.com	50.19.253.65	1 Hour
A	marmaladetm.com	50.19.253.65	1 Hour
A	www.marmaladetm.com	50.19.253.65	1 Hour
CNAME	ftp	@	1 Hour
CNAME	www	@	1 Hour
CNAME	_domainconnect	_domainconnect.gd.domaincontrol.com	1 Hour
MX	10	mail.marmaladetm.com (Priority: 10)	1 Hour

4. Results of DNS lookups to verify the DNS entries.

The screenshot shows the ViewDNS.info website interface. The browser address bar displays `viewdns.info/dnsrecord/?domain=marmaladetm.com`. The page title is "ViewDNS.info". The navigation menu includes "Tools", "API", "Research", and "Data". The "Tools" section is active, showing "ViewDNS.info > Tools > DNS Record Lookup". Below this, a text input field contains "Domain (e.g. domain.com):" and a "GO" button. The text "DNS Records for marmaladetm.com" is displayed above a table of DNS records.
