

I tried many times but I still couldn't log in. My name pops too and I put my password. But it keep saying **"you must be added by the website administrator and have approved your addition to this website before logging in."**

As you can see NONE of the current members have been added recently. **The member in question is ARCEGA.** And she joined long enough ago before the approval process was added that she shouldn't have to approve her inclusion in the MM list. Please check our Member Management lists to see if other members are affected too. (No one else has reported a problem logging in.)

Only two recent visitors were added to the Guest list but haven't replied. (A third one was added but she refused, so her name isn't there.) The working "visitor" entry in this list is me (using my alternate Yahoo email address to test).
