

1. Go to your domain host's website in a new tab

We've detected that your domain host is GoDaddy. Sign in to add verification codes to your domain settings.

GoDaddy

Domain host for portageandmain.toastmastersclubs.org

[GO TO GODADDY](#)

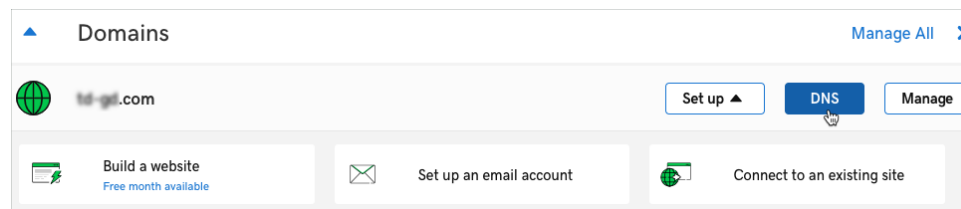

2. Sign in to your domain host

- In the GoDaddy site, at the upper right, click **Sign In**.
- Under **Registered Users**, click **Sign In**.
- Under **My Account**, enter the **Username** or **Customer #** and **Password** you created when you purchased your domain from GoDaddy. Then click **Sign In**

If you don't know your login information, [reset your GoDaddy password](#) or [contact GoDaddy Support](#).

3. Go to your MX records

From the **Domains** pane of the My Products page, click **DNS** for the domain you want to verify.

The DNS Management page opens with the DNS records table.

4. Add MX records for Gmail

- At the bottom of the **Records** table, click **Add**.
- From the **Type** drop-down list, select **MX**.
- In the **Host Record** field, enter **@**.
- In the **Points To** field, enter **ASPMX.L.GOOGLE.COM**. Don't include a period at the end of the record.
- In the **Priority** field, enter **1**.
- Leave the default value in the **TTL** field.
