

I thought this was going to be easy! Would like to post a speech that we have in “YouTube”, how can I make them visible? Scroll and see what I tried.

I know that to have a slide show to put embed code in “Source” (1) but I see an icon that says “Your Tube” (2)

I copied the end of the url for the video

<https://www.youtube.com/watch?v=PO26TO9Jfgc> and placed on #1 first and it didn't work, so I tried #2. It didn't work.
